

<b>A</b>	Introduction to probability	[10.1]
<b>B</b>	Estimating probability	[10.2, 10.6]
<b>C</b>	Probabilities from two-way tables	[10.2, 10.6]
<b>D</b>	Expectation	[10.3]
<b>E</b>	Representing combined events	[10.4, 10.6]
<b>F</b>	Theoretical probability	[10.4, 10.6]
<b>G</b>	Compound events	[10.4]
<b>H</b>	Using tree diagrams	[10.5]
<b>I</b>	Sampling with and without replacement	[10.5]

### **Contents:**

<b>A</b>	The mean of continuous data	[11.5]
<b>B</b>	Histograms	[11.6]
<b>C</b>	Cumulative frequency	[11.7]

### **Contents:**

<b>A</b>	Variables used in statistics	[11.2]
<b>B</b>	Organising and describing discrete data	[11.2, 11.3]
<b>C</b>	The centre of a discrete data set	[11.4]
<b>D</b>	Measuring the spread of discrete data	[11.4]
<b>E</b>	Data in frequency tables	[11.4]
<b>F</b>	Grouped discrete data	[11.4]
<b>G</b>	Statistics from technology	[11.8]

**Contents:**

<b>A</b>	Correlation	[11.9]
<b>B</b>	Line of best fit by eye	[11.9]
<b>C</b>	Linear regression	[11.9]
